MONTHLY MAINE FARMER.

E. HOLMES, Editor.

THE proprietors of the MAINE FARMER, in order to meet the wishes of many in the community propose to issue a Monthly Edition of the Maine Farmer, devoted exclusively to Agriculture.

It will be published in the usual form and size for college, of able number. In fitting them is fitting them is fitting them in the year. The whole will be afforded at the low price of Fifty cents per annum, payable in all the comprising Biographies, Histories, Travels, teacher of them cases in advance.

Any person who will obtain six responsible sub. cost in Boston- and some below cost. scribers, and act sysgent, shall receive a copy so long as he keeps that number good, for his services. November 1311.

BEDSEEN THIS HE THE Maine Farmer and Mechanics' Advocate.

(New Series) E. Holmes, Editor.

JHE proprietors of the Maine Farmer, in accordance with the suggestions of their friends,

and with a view to meet the wishes of a large number of their subscribers have come to the conclusion to make a change in the form and size of the paper,

the size that it now is.

They propose to issue a paper, once per week, in a large folio size, to be called MAINE FARMER AND MECHANIC'S ADVOCATE. One page is to be devoted evelusively to Agriculture one to Mechanical subjects, frequently illustrated with engiavings one page to the current news of the day, with the procedings of the Legislature and of Congress when hese two bodies are in session . sind the remaining page to be devoted to miscellaneous reading, poetry dvertisements, &c.

They presume it is not necessary to enlarge upon the peculiar character or luture course of the paper now offered to you. The Maine Farmer has been in existence nine years, steadily and perseveringly devoted to the interest of the productive classes. It devoted to the interest of the productive classes. will continue, as hitherto, a steady and undeviating friend to the Farmers and Mechanics; zealously urg ing forward the spirit of improvement, and encouraging the efforts of honest industry. Many of our best practical Farmers have long been engaged in contributing to the columns of the Farmer. as well as others will continue their aid and assistance in the Agricultural portion, and we have the assurance of many excellent Mechanics that they will also contrib-ute to the columns of their depart-

Terms \$2 per ann. \$2 50 will be charged if pay ment is delayed beyond the year. I r'Any person who will obtain six responsible

subscribers, and act as Agent, shall receive a copy, so long as he keeps that number good, for his ser vices. Winthrop, Nov. 20, 1841.

STATE OF MAINEL-LAND OFFICE, Bungor, Oct. 3, 1841. Bunger, Oct. 3, 1841.)

the settling land in the following described Townships, which has been surveyed into settling lots, and belunging to the State, is now in the market for sale and settlement, to wit:

Township No. 4, Range 5, West from the East line of the State. No. 6. No. 8, No. 9, No. 9, No 11 No. 12, No. 13, Letter F. Letter H,

Letter D. The prices for land in these Townships will vary according to the situation and quality of the luts, not less however than fifty cents, and probably not excecding one dollar per acre.

The land will be sold upon a credit of four yearly payments, with interest, the three first payments to be expended in labor on the roads in the Township where the land sold is situated, under the direction of the Land Agent, and the last payment to be in cash. Each purchaser will be required by the terms of his deed, within said four years to build a house on his lot, and to clear in a proper manner fifteen acres, ten

Whenever twenty, for a less number of persons shall give a satisfactory bond to the Land Agent. that they will within three years erect a substantial spry and Grist Mill in any Township lotted for settlers, having no mills in said Township each of said persons will be entitled to a deed of one lot of land, subject to the performance of the settling duties above mentioned, and the Company will be entitled

to a deed of the mill lot.

Not more than four lots will be sold to any one person in any town-hip or tract.

The Aroostook Road has been completed this year, to the Aroostook River, and as that river-is navigable for boats, a good communication is now opened to the settler for an easy access to each of he above mentioned Townships.

Saw and Grist Mills have been erected and are now in operation in Township Letter F, Range 2, No. 9, Range 4, and No. 11, Range 5; and contracts have been made for the erection of Mills, the ensuing year, in Township No. 9, Range 6, No. 11, Range 6, and in Letter D, Range 1.

There has been a steady demand for settling land through the season, and more lots have been sold

than in any former year. As the United States have recently established a post near the month of the Aroostook, and another at the mouth of Fish River, and have sent a Company of soldlers to each, new roads will undoubtedly be soon opened through this section of the State, mail routes established, new markets opened for produce, and the settler will feel additional security from any border difficulty.

With the known fertility of the soil, the advantage of good roads and mills, and the rapid sattlement of this part of the State, it is believed that a most favorable opportunity is now offered to young men who wish to become farmers, to secure themselves good locations, where in a few years, with in-dustry and economy, they cannot fail to secure to themselves an honorable competency ELIJAH LI HAMLIN. Land Agent of Mome

THE LION OF THE DAY.
THE OLD VEGE PARTE OR GERMAN PILLS.

(L) POSITIVE, OR NO PAY.

THEY are highly recommended by Dr. Valentine
Mott, of the city of New York. A medicine
to prevent the attacks of disease, to keep the sys tem in healthy action, and to eradicate as soon as possible every disease as soon as it appears, has been the great study of medical men for many years without success. The subscriber, however, not expeering his Pills to cure all the ills which flesh is beir to, confidently recommends them as certain and efficacious in the following: Headache, Jaundice, Dyspepsia, Cholic, billious, remittent, and intermitent Fevers, diseases of the Liver, and Spleen, Famale Obstructions. Rheumatism, Foul Stomach,

Dizziness of the Head, Loss of Appetite, Weakness, and trembling of the Limbs, Nausea, or sickness at the Stomach, Flushings of the Face, Summer Complaints, Measles, Scarlet Rash, and will be found invaluable in complaints of the Digestive Organs, and prisingly those arising from impurity of the blood-As a preventive against Fevers, no persons should on to a warm-climate without a box of these Pills; they are entirely of vegetable ingredients, and can

be taken safely without fear. Price, 374 cents a box. For sale at A. GEYER'S Drug Store, 104 Hanover street, corner of Salem street, Boston, General Agent for the N. E. Stales, and may be had at most of the Drug Stores in the U. S. and in the Canadas. The genuine Pills have the written signature of MERRITT GRIFFIN on each box.

JOHN S. SAYWARD, Editor.

THURSDAY, DECEMBER 23, 1841. Professor Shepard's Lecture before the Association of Teachers, on Education. The Lecture of Professor Shepard, 'on Tuesday evening, was listened to with the deepest attention by a very large undience. Few men can engage the attention and awaken the interest of our people in a public Lecture equal to Professor Shepard. His clear, forcible style carries his thoughts, like sharp pointed arrows, home into the mind, and there they stick.

On the present oceasion, in treating upon Ed neation, the Professor said he should aim at nothing new, striking or entertaining, but to pregent a few of the obvious principles in the science of education, in as plain and pulpable a way as he knew how.

-Fducation.has been fitly divided into three departments, physical, mental, and moral. The body, the mind, the heart, must all be trained in order to completeness in the result. He should confine himself mostly to the training of the

The mind, he said, is well educated when qualified to perform wall, the part, the work, the duties assigned to mind. For this there must be preparation. The mind, at first, is in a state of utter feebleness. It begins its career, to appearence, without any of the attributes of mind. The infant methe lap seeming to have no more sense than the kitten in the corner. But there is something there, which in half a century may reveal the power of a Webster or Brougham. But not by a course of neglect. If that mind be neglected, if there be no self culture, nor culture ciple is, that a scholar learns not chiefly fromhis learning. One-great point in education lead to a conquering power of study. should be, so to direct acquisition that it shall On the subject of school books, and their mulhe said, would be prominently occupied.

How is acquisition to be conducted so as to the main thing acquisition must be with effort. in finding out things. For there is a law in our completely brought up by any of them and canincreases by what we have. The muscles that skilful teacher. He helps him, not by solving gin with the ealf and you may carry therex. '.'

into the possession of knowledge; one, by get- works out the difficulty, and he feels that it is ting, the other, by receiving. In the one mode an achievement, and a most delightful, emotion it is an acquisition, in the other it is a gift. In refreshes his mind as he sees the result coming the one-mode, the mind is an instrument, work- right. He feels an augmentation of strength for ing out its own weath, in the other it is a capan the encountering of the next defficulty y to be filled. In the one mode the teacher? calls his scholars around him, and pours somet the moral culture be lost sight of, in the zeal for on this plan, and there is nothing to make it be any less powerful for being associated with a predecessors: grow in such a lazy, gaping, gulping passive- pure heart, but the reverse.

Turn now to the teacher who regards the for further achievements. There are many world." things in science, which can be gained only by steady persovering application there are points; which no mind can carry by storm the impetuous assailant falls back, defeated the patient plodder is in the end victorious. The Professor marked that he did not believe that everything is to be made pleasant, and suchly in education, that no cup is to be put to a child's lips, but what has sugar in it, or honey on its edge.

Another result is, the habit of inflexible diligence. It was to this that Newton ascribed all his success, and Hogath says, genius is nothing but labor, and diligence. The Professor thought however there was such a thing as genius, some boys are much brighter, and can learn much faster than others, but there is less promise of the companion, than of the slow one, although he may ling to in his lessons, if he be a persever. ing indomitable, digger. More fail through a weakness of will, than a weakness of mind.

The effort of to-day side that of to-morrow. _ | renders it still more passing strange, he has ac-The student gets independence of mind, shility cepted the office! to go alone, faith in his own faculties, the power of summoning his energies, and of concentratthese are gained by putting the mind to work expect to see them go ahead. itself, to acquire something; study out something, and they can be gained in no other way. he'is not so likely to loss as what is handed over the chimney. The damage very trifling

to him by another. Acquiration must be with DAILY WHIG AND COURTER; thoroughness as this helps to this discipline of the mind. The mind feels that it has got something. It may be but a little, yet it is sure of it. It has the ascendency over it. It feels a con- to report hie plan for a Fiscal Agent as soon as sciousness of strength from the fact that it has Possible. It is suggested that Mr. P. may be to become the agent of newspaper publishers or dominion over even a little. And from the dominion it has gained, it proceeds with confidence to strength. The precept is, yet thoroughly, same ground again and again, till it is absolutely familiar; and till it is so put into the mind, and made a very part of the mind that it can never get away. While it is true that man is a getting being, it is also true, that he is a for-getting being, and most persons who have been istudents, have forgotten more than they now lasted until the hour of adjournment, without know And the relaxing and letting go of any definite action. One portion is for reference knowledge that has been gained is a weakening to the Committee on Munufactures, while another operation.

the testimony of several ripe scholars. The Professor thought the prevalent ambition of a nue, voted for relegring to the Committee of striding progress, of a vist range, and sweep of Ways and Means. knowledge spoils many of our scholars. They know a great deal dimly, but little or nothing perfectly. They have a smattering of five, ten, fifty languages, but are masters of no one. . All this is bad for the mind. _ =

Professor stated that study is everything in edu. Means and against the principle of Protection cation. An indispensible thing. There may be improvements in education, but nothing, ever, that will abate or set aside the necessity of, study on the part of the scholar. The scholar has got to do the main part in the training of his own mind to manliness and strength. He must by others, its strength will be small and what take the laboring our, and ply it, and work himthere is will be rude and worthless. The pow-self ahead if he ever gets much shead. This er is gained, or rather fostered and brought out appears in the numerous and spendid instances by some sort of education. And he would re- the world has seen of self made men men who mark that there are two ends to be aimed at in without advantages, without teachers, by an ineducating the mind, namely by the storing of domitable energy, and inflexible application have the mind and strengthening of it, in other words, risen to the proudest heights of learning, where acquisition and discipline. The ultimate end of they now stand as monuments, demonstrating education is to discipline the mind. The print the singular efficacy of study. Pupils should have lessons to study in senool, and out of the value of the things he learns and lays up, but school, in company and in solitude by day light for the power of learning further, and of using and by lamp light, till the practice of study shall

contribute most effectually to discipline, and the tiplication, the Professor was justly severe. He power of further progress, and also the power of thought we should take only those books, in applying the resources and energies acquired to which while there is a reasonable amount of expractical purposes. With this point, the address, planation there is a reasonable amount of difficulty, for the tasking and trying of the pupil's own powers. Then there is something to be done on subserve discipline? In the first place, and as the part of the scholar and on the part of the teacher. The scholar is to work out these diffi-The scholar must study, and use all his strength cult problems, if he can. If he cannot if he is natures which we cannot change, and it applies not proceed, the teacher is to assist him, and in equally to body and to mind. It is that strength the mode of this assistance we see the adroit and we use, are thore that grow almost indefinitely the whole difficulty for him, but gives him a in largeness and might. Hence the proverb, be- hint of some principle or course lets fall a little gleam of light the pupil catches at it, goes to - Now there are two ways for the mind to come work with fresh energy, and in a little while

There is danger, the Professor thought, that thing in. He makes every thing so plain, that the mental, or that it be voluntarily given up althey are put to no labor in receiving it. And altogether on account of denominational jealousone result is, that what goes in so easy, goes out lies. But the great features of mornity will not again about as easy. Another result is, a stando any hurt to any body. No youth will be any tionary capacity. The mind does not grow up- less safe for fearing his Maker no intellect will

The Professor concluded his address by presenting the importance of the living teacher, and mind of his pupil as an instrument, as well as a the responsibilities committed to them. "When capacity, and who puts his pupil upon the labor the labor is successful," said he, "how noble the of acquisition. He is put to some effort of mind, result. Minds standing forth for service, stored, for almost every thing that comes into his mind disciplined, adapted to service on the great theahe is made to do something to get it. HYNES EXPECTORANT TRIUMPHANT. A that all interested may be benefitted by the

Lam sixty four years of age, have been four years reit seriously afflicted with ASTHMA have tried serrel physicians, and taken many certain cures, all of great expense and without any essential adan or great expenses was not able to pass the while of a night in my bed On consulting Doctor Wadsworth, of this city, whout my case, he advised me wtake Dr. Jayne's Expectorant. This medicine sperated swhe told me it would. I have taken five bottles of it, and consider myself in a manner cured I can now lay comfortably all night, am free from the tightness of the lungs and weakness of the march which so dreadfully distressed and reduced me. In short, life had become fairly burdensome to ne: now lenjoy it, though I am not entirely free rom other infrinities attendant upon old age.

NOTICE TO FAMILIES SHIP OWNERS AND MASTERS OF VESSELS

LL LOVERS OF GOODERRIAD are re commended to make use of Ww. BROWNS PORTABLE CAKE YEAST, as it makes the bread unich better than the common mode. The Yeast is free from all impure incredients, makes the bread perfectly white and light, is well adapted for ships' use, and well keep in all climates. It is how in extensive use in Buston, and orders are beginging to be received from all quarters. No bet ter evidence is wanting of its superiority, over all other articles used for rising bread than the following Certificate

Boston, May 20th 1841 The undersigned having made use of William Brown's Portable Cake Yeast for rising bread in our opinions this new preparation of Yeast is far better than any other across we have ever made use of and wall make the bread much whiter and very light, and we believe to be free from all impure ingredients

Signed by the Pastry Cooks at the Tremont House, Pavision, American House, and Mariboro' Hotel.

It is now in use at crost of the Hotels in the city, and on howed all the Steamships belonging to Mr. (ma desdime of Pacinch Arnoth rejustice area from John Anderson Pacing Cook on board the Bicomship Brittania, who writes that he has made use of Wm Biown's Yeast for making brend during two voyages heross the Atlantic, and car recommend it as far superior to any thing else for ruing bread. No restel should go to sca without

The above article is now for sale by the Propri gage, according to the statute in such cases made close, 48f Washington street. Also dealers can be and provided INCREASE S. SANGER supplied at the ajanufacturer's price by llana.
